📄 SUMMARY

Software Developer with 3+ years of experience building scalable web applications using Python, Django, React, and cloud platforms like AWS and Azure. Skilled in API development, DevOps, and delivering high-performance backend systems.

🧠 SKILLS

Languages: (Python, JavaScript, SQL)

Cloud & DevOps: (AWS, Azure, Docker, Jenkins, CI/CD)

Database: (MongoDB, MySQL, PostgreSQL)

Frameworks/Libraries: (Django, Django REST Framework, React.js, React Native, Next.js)

📁 EXPERIENCE

Vishleshan Software Solutions Pvt. Ltd

11/2023 – present | Mumbai, India

Sr. Software Developer

- Designed and implemented the backend and database schema from scratch for the Technician App, enabling real-time field operations and job tracking.
- Developed scalable backend services using Python, Django, and Docker, with a strong emphasis on REST APIs and third-party integrations.
- Improved performance for a B2B eCommerce platform using materialized views, Celery + RabbitMQ, and database replication.
- Built a modular notification system with real-time and scheduled alerts via email, SMS, and in-app messaging.
- Deployed and managed applications on AWS and Azure, ensuring consistent environments through Docker.
- Introduced Git branching strategies, mentored peers, and drove best practices in development.
- Played a key role in requirement analysis, production deployments, and maintaining robust, performant code.

Intellect Infotrade Pvt. Ltd.

04/2022 – 11/2023 | Mumbai, India

Full-Stack Developer

- Built and maintained web applications using Django (Python) and MySQL with a focus on backend scalability.
- Designed frontend interfaces using React.js and React Native for cross-platform accessibility.
- Developed RESTful APIs using Django REST Framework for seamless integration between frontend and backend.
- Collaborated closely with UI/UX designers and product teams to align deliverables with business goals.
- Integrated MQTT for real-time communication and calling features.
- Promoted use of modern frontend tools and best practices within the dev team.

📁 PROJECTS

- Edukaan (Tata Motors):** Developed a scalable B2B eCommerce platform enabling dealers to manage orders, inventory, and product catalogs.
- Technician App (Havells):** Created a technician-facing app to optimize service job assignments, workflow tracking, and real-time updates.
- SkyCRM:** Built a centralized CRM system integrating IVR, ACD, omnichannel support (email, chat, social), analytics, and workforce management.
- Spreading Knowledge (E-Learning Platform):** Developed the complete backend and frontend for an online course platform similar to UpGrad. Implemented features like course browsing, user progress tracking, secure authentication, and payment integration using Django, React.js, and REST APIs.

🎓 EDUCATION

Bachelor Of Commerce

2018 – 2021 | Mumbai, India

Viva College of Arts, Commerce and Science

Software Developer

01/2022 – 06/2022 | Mumbai, India

Itvedant IT Training Institute
